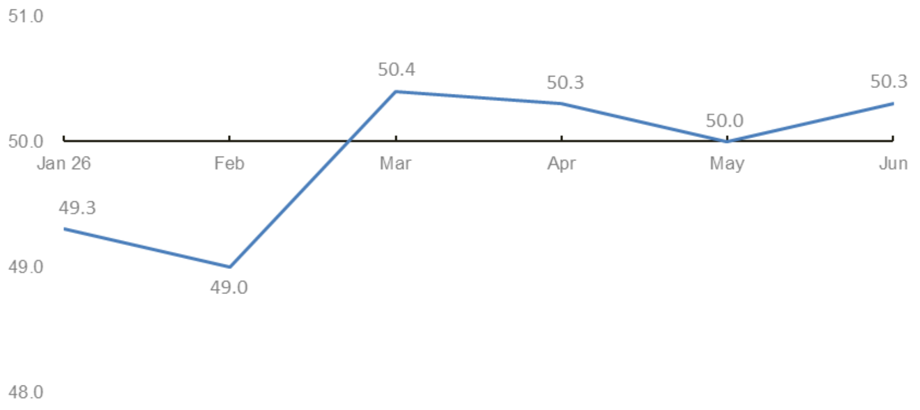
PMI Report on China Manufacturing

China's manufacturing PMI rises to 50.3 in June, indicating expansion in the manufacturing sector

China Manufacturing PMI, seasonally adjusted



China Manufacturing at a Glance – June 2026

Index	Seasonally Adjusted Index	Index Compared with the Previous Month	Direction
PMI	50.3	Higher ▲	Expanding
Output	51.4	Higher ▲	Expanding
New Orders	51.2	Higher ▲	Expanding
New Export Orders	50.1	Higher ▲	Expanding
Backlogs of Orders	47.1	Higher ▲	Contracting
Stocks of Finished Goods	47.7	Lower ▼	Contracting
Stocks of Major Inputs	48.4	Lower ▼	Contracting
Purchases of Inputs	51.4	Higher ▲	Expanding
Imports	49.6	Higher ▲	Contracting
Input Prices	54.2	Lower ▼	Rising
Ex-factory Prices	48.2	Lower ▼	Falling
Employment	48.5	Lower ▼	Contracting
Suppliers' Delivery Time	49.9	Higher ▲	Slowing
Business Expectations	54.3	Higher ▲	Optimistic

Out of the 13 sub-indices, eight recorded an increase compared with May. Notably, the new orders index climbed 1.3 pts to 51.2 in June, signalling a pickup in market demand. The new export orders index jumped 1.5 pts to 50.1, marking a return to expansionary territory. Against this backdrop, the output index edged up 0.2 pts to 51.4 in June, pointing to sustained growth in manufacturing production. In addition, the purchase of inputs index rose above the neutral level of 50 to a nine-month high of 51.4. Also noteworthy is that ex-factory prices began to fall despite a continued increase in input prices: Material prices kept rising, though at a slower pace, with the input prices index at 54.2. Meanwhile, the ex-factory prices index dropped by 3.7 pts to 48.2, indicating declines in ex-factory prices.

By size of enterprises, the PMI of “large enterprises” went down to 50.7 in June from 51.1 in May. The PMI of “medium enterprises” climbed to 50.5 in June from 48.6 in May. The PMI of “small enterprises” decreased to 48.2 in June from 48.5 in May.

The output index inched up to 51.4 in June from 51.2 in May. The output indices of “large enterprises” and “medium enterprises” remained above the neutral level of 50, registering 52.1 and 51.7 respectively in June. Meanwhile, the output index of “small enterprises” remained below 50, registering 48.1 in the month.

The new orders index rose to 51.2 in June from 49.9 in May. The new orders indices of “large enterprises” and “medium enterprises” stayed in the expansionary zone, registering 51.9 and 51.3 respectively in June. Meanwhile, the new orders index of “small enterprises” remained in the contractionary zone, registering 48.5 in the month.

The new export orders index jumped to 50.1 in June from 48.6 in May. The new export orders index of “large enterprises” remained above the critical 50-mark, registering 50.1 in June. Meanwhile, the new export orders indices of “medium enterprises” and “small enterprises” came in at 50 in the month.

The backlogs of orders index increased to 47.1 in June from 46.8 in May. The backlogs of orders indices of “large enterprises”, “medium enterprises” and “small enterprises” all remained below the neutral level of 50, registering 47.4, 47.3 and 45.4 respectively in June.

The stocks of finished goods index dropped to 47.7 in June from 49.3 in May. The stocks of finished goods index of “large enterprises” returned to the expansionary zone, registering 50.6 in June. Meanwhile, the stocks of finished goods indices of “medium enterprises” and “small enterprises” stayed in the contractionary zone, registering 47.9 and 47.2 respectively in the month.

The stocks of major inputs index edged down to 48.4 in June from 48.6 in May. The major inputs indices of “large enterprises”, “medium enterprises” and “small enterprises” all stayed below the critical 50-mark, registering 48.6, 48.9 and 46.8 respectively in June.

The purchases of inputs index rose to 51.4 in June from 49.8 in May. The purchases of inputs indices of “large enterprises” and “medium enterprises” stayed in the expansionary zone, registering 52.5 and 50.3 respectively in June. Meanwhile, the purchases of inputs index of “small enterprises” remained in the contractionary zone, registering 49.7 in the month.

The imports index went up to 49.6 in June from 48.8 in May. The imports indices of “large enterprises” and “medium enterprises” stayed below the neutral level of 50, registering 49.5 and 49.3 respectively in June. Meanwhile, the imports index of “small enterprises” rose above 50, registering 51.4 in the month.

The input prices index retreated to 54.2 in June from 60.5 in May. The input prices indices of “large enterprises”, “medium enterprises” and “small enterprises” all remained above the critical 50-mark, registering 54.0, 54.0 and 55.2 respectively in June.

The ex-factory prices index fell to 48.2 in June from 51.9 in May. The ex-factory prices indices of “large enterprises”, “medium enterprises” and “small enterprises” all dropped below the neutral level of 50, registering 48.0, 48.9 and 47.5 respectively in June.

The employment index edged down to 48.5 in June from 48.6 in May. The employment indices of “large enterprises”, “medium enterprises” and “small enterprises” all stayed in the contractionary zone, registering 48.8, 48.3 and 47.8 respectively in June.

The suppliers’ delivery time index increased to 49.9 in June from 49.2 in May. A reading above 50 implies faster delivery; below 50, slower delivery. The suppliers’ delivery time indices of “large enterprises”, “medium enterprises” and “small enterprises” registered 50.1, 49.2 and 50.6 respectively in June.

The business expectations index went up to 54.3 in June from 53.9 in May. The business expectations indices of “large enterprises”, “medium enterprises” and “small enterprises” registered 54.7, 53.9 and 53.4 respectively in June.

CFLP

中國物流與採購聯合會

China Federation of Logistics & Purchasing (CFLP) is the logistics and purchasing industry association approved by the State Council. CFLP's mission is to push forward the development of the logistics industry and the procurement businesses of both government and enterprises, as well as the circulation of factors of production in China. The government authorizes the CFLP to produce industry statistics and set industry standards. CFLP is also China's representative in the Asian-Pacific Logistics Federation (APLF) and the International Federation of Purchasing and Supply Management (IFPSM).

NBS

國家統計局

The National Bureau of Statistics (NBS), an agency directly under the State Council in China, is in charge of the country's statistics. It is responsible for formulating statistical policies and establishing the national statistical system, drafting and enforcing the statistical laws and regulations, setting up and improving the national economic accounting system, conducting censuses, as well as making statistical analyses and forecasts of the macroeconomy, social development, scientific advancement, resources and environment.

China Manufacturing PMI

中國製造業採購經理指數

China Manufacturing Purchasing Managers' Index (PMI) provides an early indication each month of economic activities in the Chinese manufacturing sector. It is jointly published by the National Bureau of Statistics (NBS) and China Federation of Logistics & Purchasing (CFLP). Fung Business Intelligence is responsible for drafting and disseminating the English PMI report.

Every month questionnaires are sent to 3,000 manufacturing enterprises all over China. The data presented herein is compiled from the enterprises' responses about their purchasing activities and supply situations. CFLP makes no representation regarding the data collection procedures, nor does it disclose any data of individual enterprises. The PMI should be compared to other economic data sources when used in decision-making.

3,000 manufacturing enterprises in 31 industries from Eastern, Northeastern, Central and Western China are surveyed. The sampling of the enterprises involves the use of Probability Proportional to Size Sampling (PPS), which means the selection of enterprises surveyed is largely based on each industry's contribution to GDP, and the representation of each geographical region.

There are 13 sub-indicators in the survey: Output, New Orders, New Export Orders, Backlogs of Orders, Stocks of Finished Goods, Purchases of Inputs, Imports, Input Prices, Stocks of Major Inputs, Ex-factory Prices, Employment, Suppliers' Delivery Time and Business Expectations. An index reading above 50 indicates an overall positive change in a sub-indicator; below 50, an overall negative change.

The PMI is a composite index based on the seasonally adjusted indices for five of the sub-indicators with varying weights: New Orders—30%; Output—25%; Employment—20%; Suppliers' Delivery Time—15%; and Stocks of Major Inputs—10%. A PMI reading above 50 indicates an overall expansion in the manufacturing sector; below 50, an overall contraction.

Currently there are more than twenty countries and regions conducting the PMI survey and compilation, based on an internationally standardized methodology.

HKUST Li & Fung Supply Chain Institute

The HKUST Li & Fung Supply Chain Institute accelerates the creation, global dissemination, and practical application of new knowledge and technologies for managing supply chains. Jointly established by international research university HKUST and supply chain industry leader Li & Fung, the Institute engages in collaborative research, exchanges, professional development and executive education to drive real-world impact across the region and globally, while contributing to Hong Kong's development as a multinational supply chain management center.
