

HKUST Li & Fung Supply Chain Institute

Global Supply Chain Summit and Conference

In this turbulent business environment, global enterprises have been reconfiguring their supply chain for resilience. This conference is a high-profile event to bring together major stakeholders, including government, business and academic communities, and partners across the globe to Hong Kong to explore how to innovate for value creation. This year also marks the 30th anniversary since the first major supply chain management conference held at the Hong Kong University of Science and Technology (HKUST) in 1995, with attendance by the very top supply chain experts at that time.

Programme

The two-day summit and conference will include keynote speeches, panel discussions, networking lunches and companies' case studies from international business leaders and renowned supply chain scholars.

Business Summit

Date: 9 December 2025
Time: 09:30 – 17:00
